

# LANDSCAPE PHOTOGRAPHY CAMP

August 21-26, 2011

In a relaxed mountain setting, learn how to use your camera to capture the beauty of the natural environment. With other adults you will spend time with a professional photographer and landscape painter who will show techniques in composition, lighting, contrast, focus and depth of field.

The main focus of this camp is to teach campers how to take time and make a good image. Enrollment is limited to provide more time for individual instruction.
